Kera Sit2Sit

- The Kera was designed in consultation with Physios and Occupational Therapists for comfort and safety.
- The Kera allows for easy transfers with a single caregiver. Quickly and easily transfer your loved one from their bed, chair or toilet to another seated position.
- The Kera is light and manoeuvrable with a small footprint and no electrical parts enabling it to be conveniently stored or transported in your home.
- Kera 80 is suitable for transferring lighter people between seats and manual wheelchairs. Ideal for children.
- Unique chestpad and backstrap combination securely lifts by the upper body, no standing or sitting strength required!
- Accessory range to adapt to user ability and size, including children.
- Low model seat heights: 14.9 - 21.6 '
- High model seat heights: 21.6 - 25.6 '
